

CYBER CAREER DEVELOPMENT
AND TRAINING SOLUTIONS

CYBER EXECUTIVE MASTERCLASS

OVERVIEW

Cyber Leadership and Strategy Solutions, LLC (CLASS-LLC) is a global professional services firm that specializes in cybersecurity career development and training. As an Authorized Training Center for EC-Council, we are one of the leading global providers of the Certified Chief Information Security Officer (CCISO) program. This program has been used to certify leading information security and risk management professionals around the world.

Our Masterclass is led by industry experts who combine real-world experience and insight with the collaboration and problem solving found in a business mastermind. We use this approach to equip business, technology, and security leaders to develop solutions to the problems they face in their organizations. The program aligns with the five CCISO domains and addresses all the components of a modern security program including governance, strategic planning, financial management, security risk management, security program management and security operations.

The content of the Masterclass covers the knowledge, skills, and abilities required for Executive Cyber Leadership, as defined by the National Initiative for Cybersecurity Careers and Studies (NICCS) in the NICE Cybersecurity Workforce Framework.

INVESTMENT

Your **\$3,500 investment** in the Masterclass provides the following benefits:

- Official digital course materials and an exam voucher for online proctoring to obtain the Certified CISO credential from EC-Council.
- Recognition as an alumnus of CLASS-LLC Masterclass program, which provides complimentary access future Masterclass sessions and discounts on other CLASS-LLC events and training.
- One year of access to the Code Red digital training library that includes thousands of training videos and content (upon request).
